OBJECTIVE

As a passionate and innovative front-end developer with a focus on building projects using React.js. As a recent graduate, I have a solid foundation in web development and a keen interest in creating dynamic and user-friendly interfaces. With hands-on experience in React.js. With a genuine passion for frontend development and a strong command of React.js, I am eager to contribute my talents and enthusiasm to a dynamic organization where I can make meaningful contributions, learn from experienced professionals, and embark on a successful career journey as a front-end developer.

<ul style="list-style-type: none">Achieved 60% growth for Value Creed using MVC, .NET, HTML, CSS, JavaScript, jQuery, and MS SQL Server skills.Led the development of the Employee Management System, which led to 60% improvement in employee management processes.Developed engaging Employee Management System that incorporated managing approvals, managing leaves, and managing employee activities and functionalities using MVC, .NET, HTML, CSS, JavaScript, jQuery, and MS SQL Server.Resolved bugs to identify and fix issues.Implemented practical software development strategies.	

PROJECTS

Recipe Finder App The Recipe finder app was developed using React.js. A user-friendly web application that allows users to search for their favorite recipes based on the food item they prefer. Also, the users can find the recipe including ingredients to prepare their favorite food item

Weather App The weather app was developed using React.js and an API that helps to get the weather details in real-time.

Auto Reply Mails Developed Auto Reply Mails using **Node.js**, is an efficient and customizable solution for automating email responses. This project simplifies the process of handling large volumes of emails and ensures timely replies to incoming messages when the user is on vacation.

Calculator App The calculator app was developed using React js which is used for calculations.

QR Code Generator The QR Code Generator project developed using **HTML, CSS, JavaScript**. Users can simply enter the desired URL, and the generator quickly creates a scannable QR code. This project is ideal for businesses, marketers, and individuals who want to promote their websites or share URLs in a convenient and visually appealing manner.

My Portfolio My [Portfolio](#) is a dynamic and visually appealing website developed using **HTML, CSS, and JavaScript** to showcase my skills, education, projects, and achievements.

ACHIEVEMENTS

- Got a Golden badge in Hackerrank for 10 days of Javascript challenge.
- Got Silver badge in Hackerrank for SQL learning challenge.
